General Service Announcement Cocos and Christmas Islands

To: Zentner Shipping Pty Ltd
Attn: Ernie Zentner

Singapore 20th March

Dear Ernie,

Having reviewed the delays incurred at Cocos and Christmas Islands over the last 12 months, it is no longer possible for ASC Liner Services Pte Ltd to absorb these additional costs.

It has therefore been decided that ASC Liner Services will now charge for any delays and extra operational expenses whilst waiting to conduct cargo operations at each island.

This is inclusive but not limited to adverse weather and congestion, which has delayed the cargo operations/working of the ship.

Delays to the vessel will be charged at **USD 12,000.00 per day pro rata** and extra pilotage at Christmas Island, if any will be charged at **AUD 4,000.00** for additional unberthing and re-berthing.

These measures will become effective from MV Borkum voyage BK1902 scheduled to depart Fremantle 08th May 2019 agw wp ucae.

By introducing these practices, we will be on par with standard shipping practices that are being applied worldwide.

We will only charge in the event that the operation of the vessel was delayed and we will look at every voyage individually to provide you with the potential cost.

To avoid any misunderstanding, the wording 'pro rata' implies that the total detention amount will be shared amongst the various shippers with cargo on the ship and based on the percentage that their cargo represents for the particular port call.

Best Regards

Lars Vetterlein
Liner Manager
